Note: See Note, table 3.106. In trend tables "constructed" or "adapted" by SOURCEBOOK staff from *Crime in the United States*, the data were taken from the first year in which the data were reported. It should be noted that the number of agencies reporting and the populations represented vary from year to year.

The Uniform Crime Reporting Program requests that additional information be transmitted to the FBI when a murder or nonnegligent manslaughter has been committed. The actual number of offenses presented in the tables displaying characteristics of murders and nonnegligent manslaughters known to the police may differ from figures in other tables that reflect data from only the initial report on the offense.

<sup>a</sup>Because of rounding, percents may not add to total.

<sup>b</sup>This category includes beatings and strangulations. "Pushed" also is included in personal weapons.

<sup>c</sup>This category includes poison, explosives, fire, narcotics, and asphyxiation.

<sup>d</sup>Beginning in 1991, this category includes drownings.
